

## INTRODUCTION

**Wonder Cement** is a cutting-edge cement manufacturing company with an ambition to establish itself as a leading player in the industry. Enriched with the heritage of **R.K. Marble**, a leading name in the marble industry, our corporate culture is built on the values of quality, trust and transparency. An emphasis on technological superiority enables us to differentiate our offering through impeccable quality and effective communication. With an extensive network of dealers, we endeavor to earn a place in the premium segment of the market.

Our cement plant, located in **Nimbahera, District Chittorgarh, in Rajasthan**, The state of the art manufacturing unit was established in technical collaboration with ThyssenKrupp and Pfeiffer Ltd. of Germany, the world leaders in cement technology, and it produces cement at par with international standards. Special effort was taken to ensure that the plant upholds the latest environmental norms and with the help of a reverse air bag house, ESP and a number of nuisance bag filters, the plant remains clean & dust free.

**COMPLIANCE STATUS OF STIPULATED CONDITIONS OF “ENVIRONEMNT CLEARANCE”**

<b>NAME &amp; LOCATION OF THE PROJECT</b>	Mining Project with Production capacity 5.0 Million TPA (ROM) in mine lease area of 255.0032 ha. The mine lease area is located near village (s): Karunda, Payri, Dhanora, Maliya Khedi, Tehsil- Nimbahera, District- Chittorgarh, and Rajasthan.
<b>ENVIRONMENTAL CLEARANCE LETTER NO.</b>	J-11015/46/2015-IA-II(M)Dated: <b>05/01/2017</b>
<b>PERIOD OF THE COMPLIANCE REPORT</b>	<b>Jan-17 to Mar-2017</b>

**Point wise reply of the Environmental Clearance Letter No.: J-11015/46/2015-IA-II(M)on Dated 05/01/2017 by M/s. Wonder Cement Limited as below**

**NOTE : CONSTRUCTION WORK OF THIS PROJECT HAS NOT YET STARTED**

**A. SPECIFIC CONDITIONS**

<b>S. No</b>	<b>Conditions</b>	<b>Compliance Status</b>
<u>1.</u>	This Environmental clearance is granted subject to decision of the State Government of Rajasthan on the order of Revisionary Authority, Ministry of Mines in the matter of M/s Wonder Cement Ltd. versus State Government of Rajasthan vide order no. 337/2016, dated 14.12.2016.	<i>Agreed</i>
<u>2.</u>	Environmental clearance is granted subject to final outcome of Hon'ble Supreme Court of	<i>Noted &amp; Agreed</i>

**Compliance Status of Stipulated Conditions of “ENVIRONMENT CLEARANCE” Accorded by the MoEF on dated 5<sup>th</sup> Jan 2017 by M/s. Wonder Cement Limited**

**Annexure-A**

	India, Hon'ble High Court of Rajasthan, Hon'ble NGT and any other Court of Law, if any, as may be applicable to this project.	
3.	This Environmental clearance is granted subject to necessary permissions for land use to be obtained from the State Govt. of Rajasthan before commencing the activities	<i>Agreed, we will obtain all the permission before commencement of mine</i>
4.	No mining activities will be allowed in forest area, if any, for which the Forest Clearance is not available.	<i>Not Applicable, our mining area is not falling in forest area.</i>
5.	The Environmental Clearance is subject to obtaining requisite NBWL Clearance, if any, from the Standing Committee of National Board for Wildlife for Mining project.	<i>Noted, No Ecological Sensitive Areas (National Park, Wild Life Sanctuary, Biosphere Reserves etc.) within 15 km radius of the project site</i>
6.	The Project Proponent shall obtain Consent to Operate from the State Pollution Control Board, Rajasthan and effectively implement all the conditions stipulated therein.	<i>Noted will obtain consent to operate before start of mine</i>
7.	The Proponent shall install online Ambient Air Quality Monitoring System and there should be system for display of digital AAQ data within 03 months at least at three locations as per wind direction. Online provisions of pH and turbidity meters at discharge points of STP and ETP and also at water storage ponds in the mining area may be made. Project Proponent should display the result digitally in front of the main Gate of the mine site.	<i>Agreed</i>
8.	Total project affected families are 464 including 457 land owners and 7 Dwelling unit as well as land owner. Project Proponent committed that the company proposes Rs. 10.71 Lakhs per dwelling unit for providing housing units for seven families and land area for dwelling units will be provided @1.5 times the area of the present house. Project Proponent committed that the company proposes land compensation at Rs 30.0 lakhs per hectare. The Project Proponent also proposes additional	<i>Agreed, As per commitment we will provide all the facilities to project affected person and budget will spend accordingly.</i>

	<p>financial support over and above cost of the land as Onetime Rehabilitation Allowance at Rs 5.0 lakhs per hectare to the land owners owning the land in lease area and direct and indirect Employment to 352 persons out of total PAFs (464) as per their qualification and skills. The above is the minimum proposed compensation offered by the Project Proponent, in addition to the cost of the land, for the Project Affected Families due to land acquisition. Detailed R&amp;R action Plan has been prepared for the project. The implementation Report shall be submitted to the Regional Office of the MoEFCC, SPCB.</p>																
<p>9.</p>	<p>Project Proponent shall obtain the necessary prior permission from the Central Ground Water Authority changes in Ground water level and quality shall be submitted to the Regional Office of the Ministry, CGWA and State Pollution Control Board</p>	<p><i>We will obtain CGWA Permission if required.</i></p>															
<p>10.</p>	<p>Project Proponent should plant only native species for green belt development. Plantation of local species should be carried out during the Monsoon Season</p>	<p><i>Agreed</i></p>															
<p>11.</p>	<p>The project should also implement community Development and Welfare programme in the area of Health, Education and Environmental Protection</p>	<p><i>Agreed, This is regular activities and carried out through well-established Corporate Social Responsibility Department by Wonder Cement Ltd. At present Wonder Cement group spend <b>1062.15</b> Lakhs for last six months.. The Details of CSR Activities expenditure are mention below table no.1.1</i></p> <p align="center"><b><u>TABLE NO.1.1</u></b></p> <table border="1"> <thead> <tr> <th><i>Sr. No.</i></th> <th><i>Particular</i></th> <th><i>CSR Expenditure (in Lakhs)</i></th> </tr> </thead> <tbody> <tr> <td><i>1.</i></td> <td><i>Community Infrastructure Development</i></td> <td><b>23.79</b></td> </tr> <tr> <td><i>2.</i></td> <td><i>Education Promotion</i></td> <td><b>6.93</b></td> </tr> <tr> <td><i>3.</i></td> <td><i>Health &amp; Family Welfare</i></td> <td><b>6.28</b></td> </tr> <tr> <td><i>4.</i></td> <td><i>Natural Resources Management</i></td> <td><b>50.74</b></td> </tr> </tbody> </table>	<i>Sr. No.</i>	<i>Particular</i>	<i>CSR Expenditure (in Lakhs)</i>	<i>1.</i>	<i>Community Infrastructure Development</i>	<b>23.79</b>	<i>2.</i>	<i>Education Promotion</i>	<b>6.93</b>	<i>3.</i>	<i>Health &amp; Family Welfare</i>	<b>6.28</b>	<i>4.</i>	<i>Natural Resources Management</i>	<b>50.74</b>

**B. GENERAL CONDITION**

<b>S. No</b>	<b>Conditions</b>	<b>Compliance Status</b>
1.	A Final Mine Closure Plan along with details of Corpus Fund shall be submitted to the Ministry of Environment, Forest and Climate Change 5 years in advance of final mine closure for approval.	<i>Noted, &amp; Shall be Complied</i>
2.	No change in mining technology and scope of working should be made without prior approval of the Ministry of Environment, Forest and Climate Change.	<i>Mining will be done as proposed and approved by Ministry of Environment, Forest &amp; Climate Change that is with the help of mine machinery.</i>
3.	No change in the calendar plan including excavation, quantum of mineral and waste should be made	<i>Noted, there will be no change in calendar plan. Mining is being done according to conditions stated in EC &amp; Consent to operate conditions imposed by RSPCB.</i>
4.	The project proponent shall obtain necessary prior permission of the competent authorities for drawl of requisite quantity of water (surface water and ground water) for the project.	<i>We will obtain necessary prior permission of the competent authorities for drawl of requisite quantity of water if required</i>
5.	Mining shall be carried out as per the provisions outlined in mining plan approved by Indian Bureau of Mines (IBM) as well as by abiding to the guidelines of Directorate General Mines Safety (DGMS).	<i>we will be done mining as per the IBM approved mining plan/mining scheme</i>
6.	The project proponent shall carry out scientific investigation in respect of "Blast induced ground vibration, fly rock & air blast". Based on this study, Project Proponent should design an effective blast design to curb blast induced menace and public annoyance. The Report shall be submitted to the Regional Office of the Ministry.	<i>We will carry out all the study related to blasting operation before operation of mine</i>
7.	The lands which are not owned by Proponent, mining will be carried out only after obtaining the consents from all the concerned land owners as per the provisions of the Mineral Concession Rules, 1960 and MMDR Act, 1957.	<i>Noted &amp; Agreed</i>

8.	Digital processing of the entire lease area using remote sensing technique shall be carried out regularly once in three years for monitoring land use pattern and report submitted to Ministry of Environment, Forest and Climate Change its Regional Office.	<i>Digital processing of entire lease area using remote sensing will be done</i>
9.	The critical parameters as per the Notification 2009 such as PM10, PM2.s, NON, and SOx etc. in the ambient air within the impact zone, peak particle velocity at 300m distance or within the nearest habitation, whichever is closer shall be monitored periodically. Further, quality of discharged water shall also be monitored [(TDS, DO, PH and Total Suspended Solids (TSS)]. The monitored data shall be uploaded on the website of the company as well as displayed on a display board at the project site at a suitable location near the main gate of the Company in public domain. The circular No. J-20012/1/2006-IA.II (M) dated 27.05.2009 issued by Ministry of Environment, Forest and Climate Change shall also be referred in this regard for its compliance	<i>Noted</i>
10.	Effective safeguard measures such as regular water sprinkling shall be carried out in critical areas prone to air pollution and having high levels of PM10 and PM2.5 such as haul road, loading and unloading point and transfer points. Fugitive dust emissions from all the sources shall be controlled regularly. It shall be ensured that the Ambient Air Quality parameters conform to the norms prescribed by the Central Pollution Control Board in this regard. Monitoring of Ambient Air Quality to be carried out based on the Notification 2009, as amended from time to time by the Central Pollution Control Board.	<i>Agreed, Regular water sprinkling will be done to control the dust emissions &amp; dust suppression on the haul road, loading &amp; unloading of the material.</i>
11.	Regular monitoring of ground water level and quality shall be carried out in and around the mine	<i>Regular water level &amp; water quality will be monitor in operation phase of the mine</i>

	<p>lease by establishing a network of existing wells and constructing new piezometers during the mining operation. The project proponent shall ensure that no natural water course and/or water resources shall be obstructed due to any mining operations. The monitoring shall be carried out four times in a year pre- monsoon (April-May), monsoon (August), post-monsoon (November) and winter (January) and the data thus collected may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board.</p>	
<u>12.</u>	<p>Regular monitoring of the flow rate of the springs and perennial nallahs flowing in and around the mine lease shall be carried out and records maintain. The natural water bodies and or streams which are flowing in an around the village, should not be disturbed. The Water Table should be nurtured so as not to go down below the pre-mining period. In case of any water scarcity in the area, the Project Proponent has to provide water to the villagers for their use. A provision for regular monitoring of water table in open dug wall located in village should be incorporated to ascertain the impact of mining over ground water table.</p>	<p><i>Noted &amp; Agreed</i></p>
<u>13.</u>	<p>Regular monitoring of water quality upstream and downstream of water bodies shall be carried out and record of monitoring data should be maintained and submitted to the Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority, Regional Director, Central Ground Water Board, State Pollution Control Board and Central Pollution Control Board.</p>	<p><i>Same shall be complied</i></p>
<u>14.</u>	<p>Transportation of the minerals by road passing through the village shall not be allowed. A 'bypass'</p>	<p><i>We will use pucca road for transportation of minerals</i></p>

	road should be constructed (say, leaving a gap of at least 200 meters) for the purpose of transportation of the minerals so that the impact of sound, dust and accidents could be mitigated. The project proponent shall bear the cost towards the widening and strengthening of existing public road network in case the same is proposed to be used for the Project. No road movement should be allowed on existing village road network without appropriately increasing the carrying capacity of such roads.	
15.	The illumination and sound at night at project sites disturb the villages’ in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day light/night hours.	<i>We will conduct health check up time to time &amp; if find same we will take care accordingly, all the precaution measure will be adopted to mitigate the problem.</i>
16.	Main haulage road in the mine should be provided with permanent water sprinklers and other roads should be regularly wetted with water tankers fitted with sprinklers. The material transfer points should invariably be provided with Bag filters and or dry fogging system. In case of Belt-conveyors facilities the system should be fully covered to avoid air borne dust; Use of effective sprinkler system to suppress fugitive dust on haul roads and other transport roads shall be ensured.	<i>Same shall be carried out water sprinkling or haul roads water sprinklers on haul road will be provided</i>
17.	Sufficient number of Gullies to be provided for better management of water. Regular Monitoring of pH shall be included in the monitoring plan and report shall be submitted to the Ministry of Environment, Forest and Climate Change and its Regional Office on six monthly basis.	<i>Same shall be complied in Commencement stage of mining</i>

18.	There shall be planning, developing and implementing facility of rainwater harvesting measures on long term basis and implementation of conservation measures to augment ground water resources in the area in consultation with Central Ground Water Board.	<i>Rainwater harvesting plan will be prepared &amp; will implementing the later stage</i>
19.	The Project Proponent has to take care of gullies formed on slopes. Dump mass should be consolidated with proper filling/leveling with the help of dozer/compactors.	<i>Same shall be complied</i>
20.	The reclamation at waste dump sites shall be ecologically sustainable. Scientific reclamation shall be followed. The local species may be encouraged and species are so chosen that the slope, bottom of the dumps and top of the dumps are able to sustain these species. The aspect of the dump is also a factor which regulates some climatic parameters and allows only species adapted to that micro climate.	<i>Complied as per mine closure plan local species will preferred for plantation</i>
21.	The top soil, if any, shall temporarily be stored at earmarked site(s) only and it should not be kept unutilized for long. The topsoil shall be used for land reclamation and plantation. The over burden (OB) generated during the mining operations shall be stacked at earmarked dump site(s) only and it should not be kept active for a long period of time. The maximum height of the dumps shall not exceed 8m and width 20 m and overall slope of the dumps shall be maintained to 45°. The OB dumps should be scientifically vegetated with suitable native species to prevent erosion and surface run off. In critical areas, use of geo textiles shall be undertaken for stabilization of the dump. The entire excavated area shall be backfilled and afforested. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining. Compliance	<i>Same shall be implemented as per approved mining plan &amp; Mine closure plan.</i>

	status shall be submitted to the Ministry of Environment, Forest and Climate Change and its Regional Office on six monthly basis.	
<u>22.</u>	Catch drains and siltation ponds of appropriate size shall be constructed around the mine working, mineral and OB dumps to prevent run off of water and flow of sediments directly into the river and other water bodies. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains shall be regularly desilted particularly after monsoon and maintained properly. The drains, settling tanks and check dams of appropriate size, gradient and length shall be constructed both around the mine pit and over burden dumps to prevent run off of water and flow of sediments directly into the river and other water bodies and sump capacity should be designed keeping 50% safety margin over and above peak sudden rainfall (based on 50 years data) and maximum discharge in the area adjoining the mine site. Sump capacity should also provide adequate retention period to allow proper settling of silt material. Sedimentation pits shall be constructed at the corners of the garland drains and desilted at regular intervals.	<i>Same shall be implemented as per approved mining plan &amp; Mine closure plan.</i>
<u>23.</u>	Plantation shall be raised in a 7.5m wide green belt in the safety zone around the mining lease, backfilled and reclaimed area, around water body, along the roads etc. by planting the native species in consultation with the local DFO/Agriculture Department and as per CPCB Guidelines. The density of the trees should be around 2500 plants per ha. Greenbelt shall be developed all along the mine lease area in a phased manner and shall be completed within first five years.	<i>Plantation/green belt development activities have already been started by Wonder Cement Ltd. . Plantation are developing with 89% survival rate . Details are mention below table No.3.1.</i>

**Table No. 3.1**

Duration	Mines Area		
	Trees	Shrubs	Total
2011-12	611	0	611
2012-13	10511	1172	11683
2013-14	15177	3379	18556
2014-15	12723	55	12778
2015-16	5684	725	6409
2016-17	1895	578	2473

*Planting species of Trees are Neem, Spathodia, Alstonia, Champa, Bottle Palm, Peltophoram, Fish Tail Palm, Casuriana, Harsinghar, Jangal Jalabi, Green Bamboo, Golden Bamboo etc. & Shrubs Species are Anar, kaner, Ficus panda, Mogra, amrud, Canna, Bismarkia palm, Chandani, Tecoma gaudi chaudi, Torch glory, Gultara, Tecoma capensis, Aclypha, Callindra, Thevatia, Bougainvillea, Agave, Furcaria, Euporbia mill etc.*

*Same shall be complied for above project.*

*Some photographs of Green belt development of Wonder Cement Ltd. As enclosed Annexure-2.*

**24.** Project Proponent shall follow the mitigation measures provided in Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29<sup>th</sup> October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area", if any, applicable to the project.

*All the mitigation measure will adopted*

**25.** The Project Proponent shall make necessary alternative arrangements, where required, in consultation with the State Government to provide alternate areas for livestock grazing, if any. In this context, Project Proponent should implement the

*Same shall be Complied*

	directions of the Hon’ble Supreme Court with regard to acquiring grazing land. The sparse trees on such grazing ground, which provide mid-day shelter from the scorching sun, should be scrupulously guarded against felling and plantation of such trees should be promoted.	
<u>26.</u>	The project proponent shall take all precautionary measures during mining operation for conservation and protection of endangered fauna, if any, spotted in the study area. Action plan for conservation of flora and fauna shall be prepared and implemented in consultation with the State Forest and Wildlife Department. A copy of action plan shall be submitted to the Ministry of Environment, Forest and Climate Change and its Regional Office.	<i>Action plan for conservation of flora &amp; fauna will; be submitted for approval.</i>
<u>27.</u>	At least 2.5% of the total cost of the project shall be earmarked towards the Enterprise Social Commitment (ESC) based on local needs and action plan with financial and physical breakup/details shall be prepared and submitted to the Ministry's Regional Office located at Lucknow. Implementation of such program shall be ensured accordingly in a time bound manner.	<i>Same shall be complied</i>
<u>28.</u>	Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.	<i>Will complied</i>
<u>29.</u>	Measures should be taken for control of noise levels below 85 dBA in the work environment. Workers engaged in operations of HEMM, etc. should be provided with ear plugs / muffs.	<i>All the control measures will be adopted for the mitigation of Noise.</i>

<u>30.</u>	Industrial waste water (workshop and waste water from the mine) should be properly collected, treated so as to conform to the standards prescribe dunder GSR 422(E) dated 19 <sup>th</sup> May,1993 and 31st December,1993 or as amended from time to time. Oil and grease trap should be installed before discharge of workshop effluents.	<i>Waste water from work shop will be treated properly.</i>
<u>31.</u>	Personnel working in dusty areas should wear protective respiratory devices and they should also be provided with adequate training and information on safety and health aspects	<i>Noted, We will provided PPE's like Mask, Hand gloves, ear plugs, goggles etc. for personal working in dusty area.</i>
<u>32.</u>	A separate environmental management cell with suitable qualified personnel should be set-up under the control of a Senior Executive, who will report directly to the Head of the Organization	<i>A separate environmental management cell is already functioning under the control of senior executive for environment activities.</i>
<u>33.</u>	The funds earmarked for environmental protection measures should be kept in separate account and should not be diverted for other purpose. Year wise expenditure should be reported to the Ministry and its Regional Office.	<i>Noted, Expenditure on Environment Management will be submitted on yearly basis.</i>
<u>34.</u>	The project authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.	<i>Noted</i>
<u>35.</u>	The project proponent shall submit six monthly reports on the status of the implementation of the stipulated environmental safeguards to the Ministry of Environment, Forest and Climate Change, its Regional Office, Central Pollution Control Board and State Pollution Control Board.	<i>Same shall be complied</i>
<u>36.</u>	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by	<i>Noted</i>

	furnishing the requisite data / information / monitoring reports.	
37.	A copy of clearance letter will be marked to concerned Panchayat / local NGO, if any, from whom suggestion / representation has been received while processing the proposal.	<i>Complied, Copy of Environment Clearance submitted to concern gram phanchyat. The receipt copy of submission as enclosed as <b>Annexure-3</b>.</i>
38.	State Pollution Control Board should display a copy of the clearance letter at the Regional office, District Industry Centre and Collector's office/ Tehsildar's Office for 30 days.	<i>Noted</i>
39.
